 Management & Development

Passion for Performance ... شغف الأداء

# WHO WE ARE

American management is a group of young professional dedicated team, operating an economic enterprise with a diversified international business portfolio and investments. We play major roles in emerging the national economy in young markets. Our team of professionals, always lead by best practice and is always target oriented for a sound and a thorough contribution towards a sustainable development for all stakeholders, including our corporation and all those who are part of the process plus the society at large.

# CEO MESSAGE

Since its inception in 2015, “American Management & Development” has been penetrating investments that are highly attractive and pinpointing well growing & evolving sectors in the Middle East such as; Energy, Tourism, Hospitality, Marketing and communication, Real estate and much more.

Today we emphasize on building long term partnerships with all stakeholders, especially companies we associate with, aiming to expand investments in further areas in the near future. Our strength comes from a diversified capabilities & experience across different zones, and we deploy our expertise and relations with our proficient partners in order to deliver immense benefits and returns to all stakeholders.

# VISION

Be leaders in all our offerings, and enrich the national development process through an adequate experience and a role model practice, one that can be categorized as a true Success Story.

# MISSION

Challenge each other and always raise the bar for an outstanding and evolving performance that would lead to distinguished partnerships, as well as build on the competencies of each talent in every team, all with the aim to deliver a satisfactory experience through every interaction, and help in the growth of every investment we run and by that contribute to the socioeconomic development of each community in which we operate.

# VALUES

We believe in; Professionalism, Dedication, Passion, Integrity and Transparency, all are genuine values that shape our attitude and overall Performance as well.

# ENERGY

The energy industry is one of the markets that has experienced extreme growth after the past few years especially in wind and solar. As the demand for renewable energy continues to increase there are a number of companies that are ramping up in their efforts for developing climate friendly solutions.

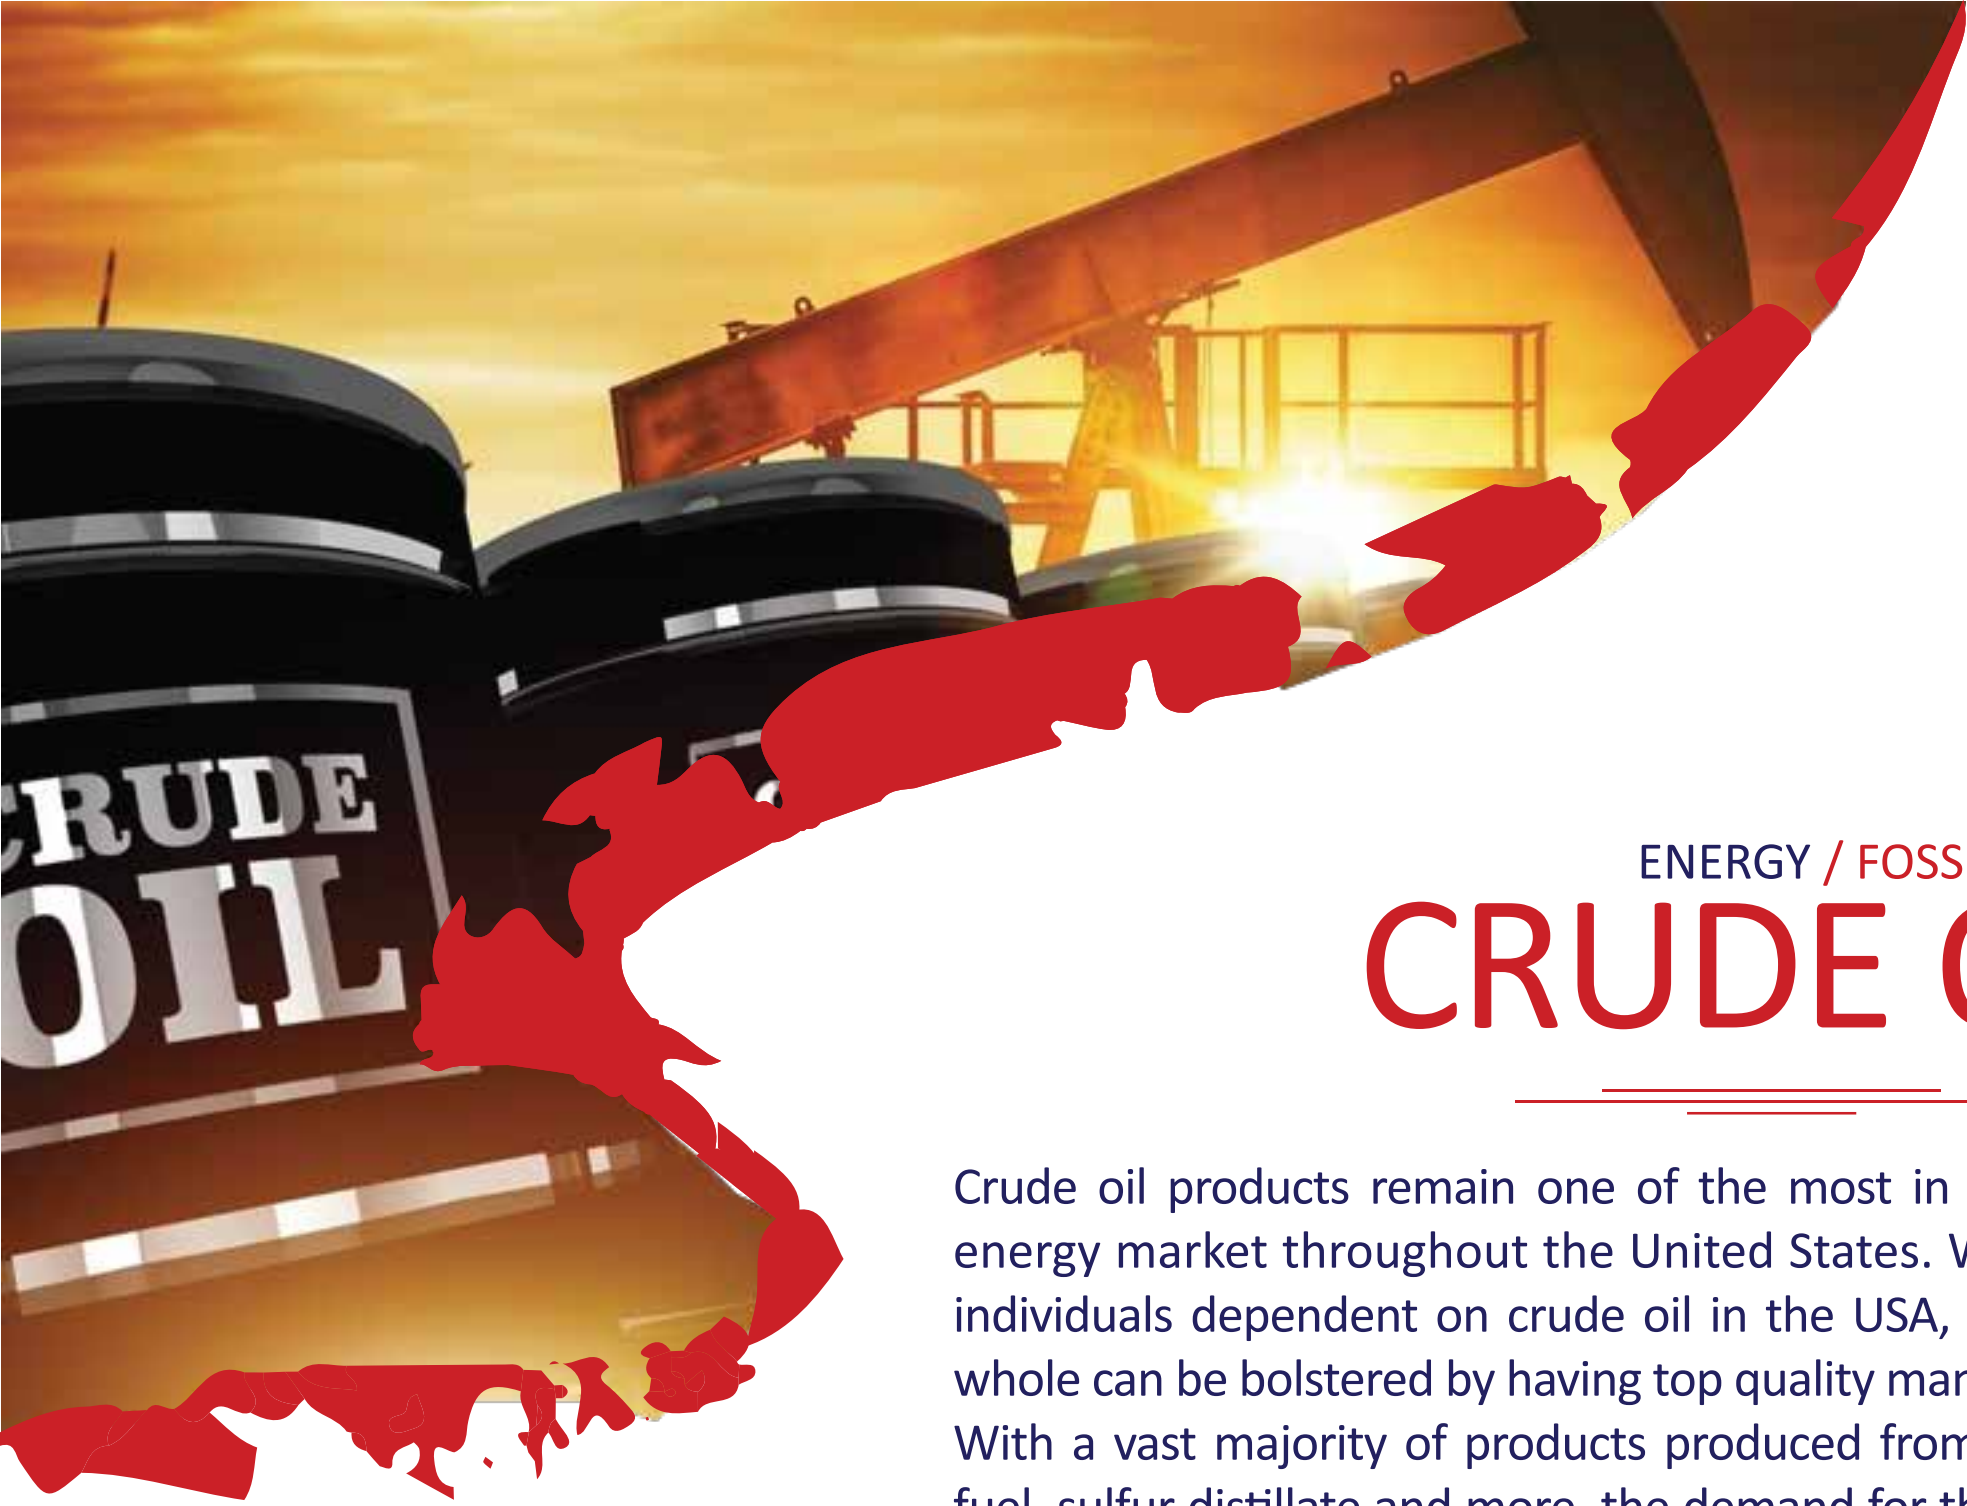

Our company is directly responsible for meeting customer needs with high-quality products at extremely affordable prices. We can cover some of the largest sectors of the energy market including energy storage, oil and gas, offshore energy and wind, geothermal, power generation, transportation, distribution and transmission. We operate in a number of energy sectors including:

# ENERGY FOSSIL ENERGY

Fossil energy harnesses the power of natural processes in order to produce energy products. The vast majority of US energy use is dominated by fossil energy and we continue to produce a large number of products in this market. Fossil fuels were at one time responsible for 92% of all US energy but today this is scaled back considerably.

We can work to offer products that include pipeline solutions, storage, drilling solutions and more. Although fossil fuel use has declined recently over the past two decades with various embargoes and fuel economy savings, this energy solution is still highly in demand across the United States.

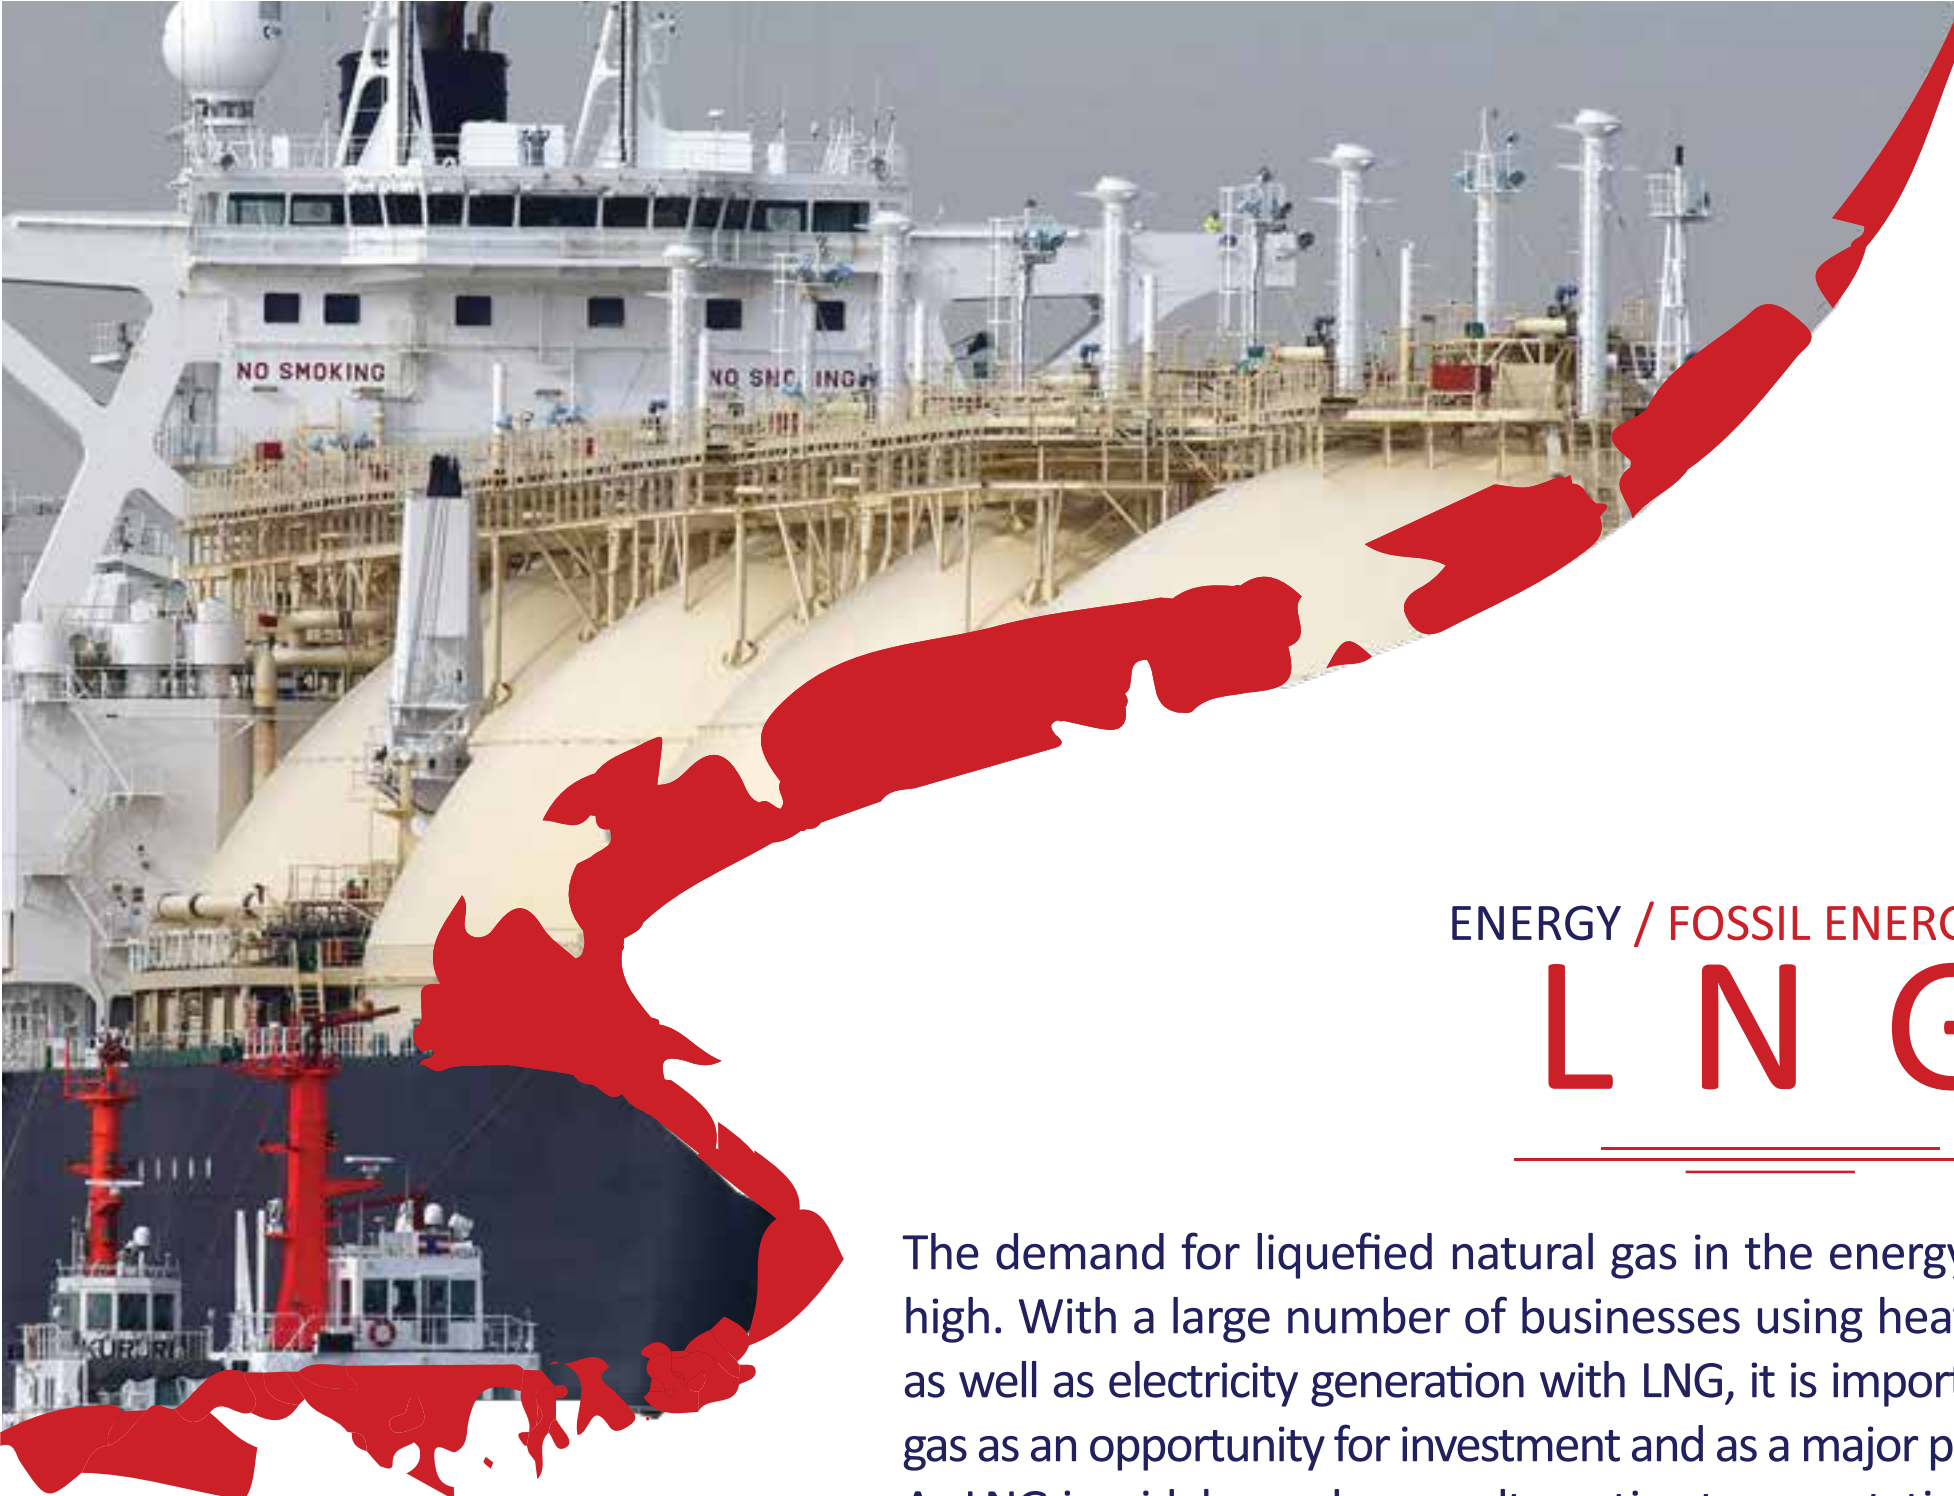

ENERGY / FOSSIL ENERGY  
**CRUDE OIL**

---

Crude oil products remain one of the most in demand solutions within the energy market throughout the United States. With so many businesses and individuals dependent on crude oil in the USA, fossil fuels and crude oil as a whole can be bolstered by having top quality manufacturing to back it.

With a vast majority of products produced from crude including gasoline, jet fuel, sulfur distillate and more, the demand for these types of products is in no danger of falling anytime soon. Finding new ways to refine petroleum products with a shortage of crude as well as refining our products for efficiency is how we can stay above the competition.

Contact us today if you need crude oil solutions in the United States.

ENERGY / FOSSIL ENERGY

# L N G

---

The demand for liquefied natural gas in the energy industry still remains quite high. With a large number of businesses using heating and cooking equipment as well as electricity generation with LNG, it is important to consider liquid natural gas as an opportunity for investment and as a major product in the energy industry. As LNG is widely used as an alternative transportation fuel, our products regularly make their way into large scale fleet storage and more. As we continue to develop our products in the future we plan on offering some of the best pricing on LNG products within the marketplace.

Contact us today for LNG solutions throughout the United States.

ENERGY / FOSSIL ENERGY

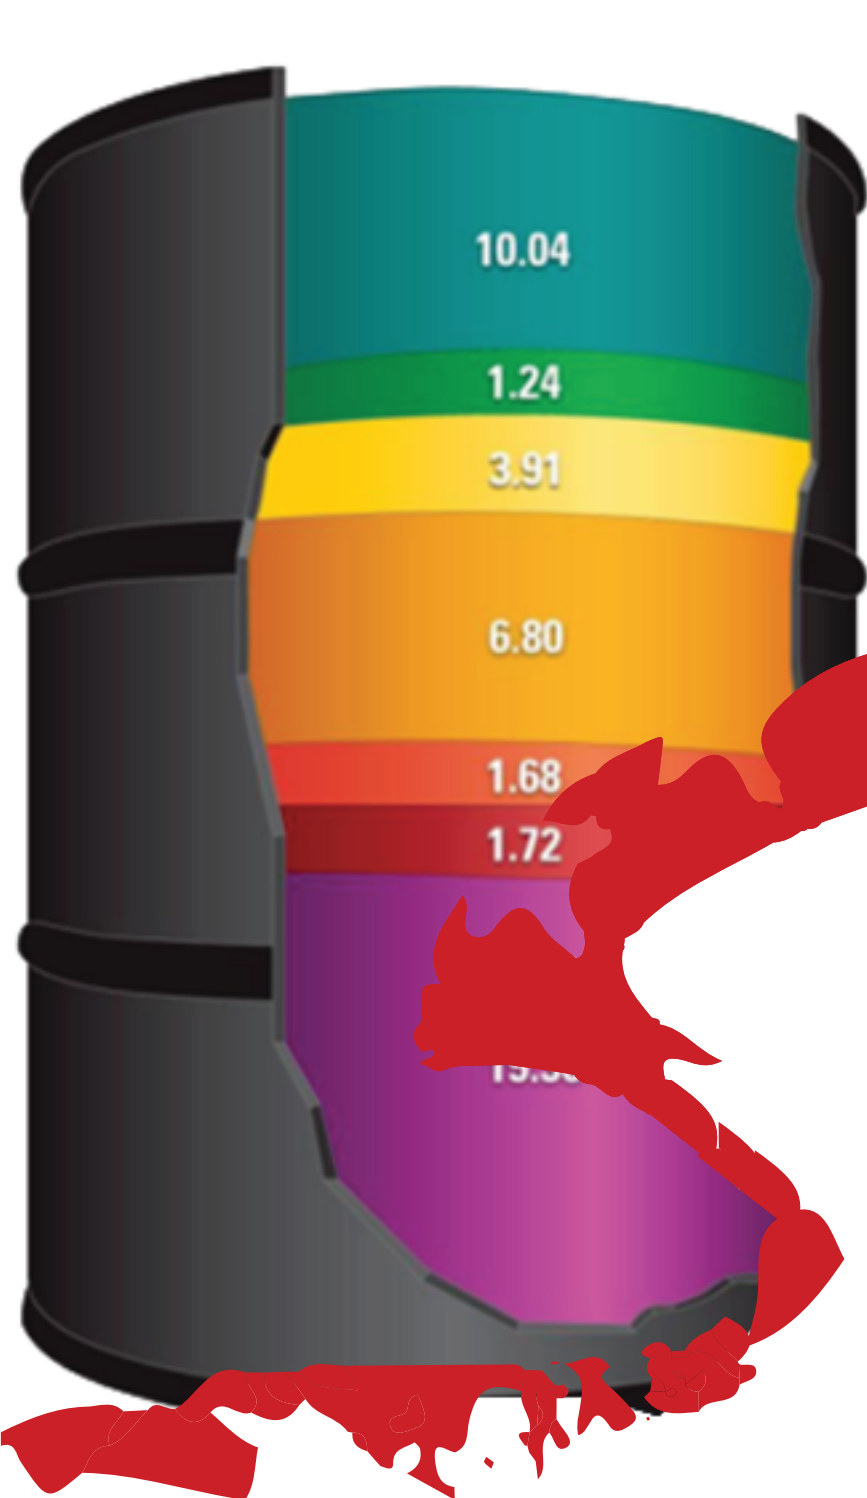

# L P G

---

The LPG is otherwise known as the liquefied petroleum gas market. At Passion for Performance, we can deliver a large range of liquefied petroleum gas products. Our company based in the United States can work as one of the largest exporters of LPG products for a worldwide marketplace.

Alongside the USA and others, LPG products can provide gas processing solutions that can prevent a series of improvements across the energy industry. We have butane and propane products that are widely suited for use across international standards. We can offer effective pricing on a number of products in this industry.

If you work in the LPG industry and you are in the market for new products, contact us today.

ENERGY / FOSSIL ENERGY

# PETROLEUM PRODUCTS

At Passion for Performance, we supply a wide range of manufactured parts for the petroleum products industry. With the demand for petroleum rising across the world, our company can make the process of refinement and easier, with the help of our products, we can meet the demands of providers operating in petroleum energy sales worldwide.

We provide regular research and development to improve our products and deliver added value to our customers. Contact us today if you work in the petroleum industry and you could use assistance with new products.

# ENERGY GREEN ENERGY

We provide green energy solutions in the form of products that can lead to more sustainable forms of energy in the future. We can assist with a wide range of green energy solutions for solar power, wind power and more. We want to make sure that the process of converting over to more sustainable types of energy can be done with products you can count on.

Passion for performance works with a number of suppliers across the United States and provide affordable green energy products that can assist any company in producing quality green energy. The demand for these products is only continuing to increase and as a result we are working on research and development tasks to revolutionize green energy products for the future.

ENERGY / GREEN ENERGY

# GEOHERMAL ENERGY

---

With Geothermal energy on the rise, partnering with a supplier like Passion for Performance can give you access to some of the greatest products in the green energy market. As geothermal energy can harness the heat from the earth to produce highly sustainable energy, it is possible to enjoy a better form of power generation in harnessing the power of our planet.

Geothermal energy is rising in demand and we have products that are developed to help with the generation of electricity using these means as well as the option to warm and cool buildings around the world. As more construction projects adopt the use of green energy and as more energy grids account for the use of green energy, we can work alongside the companies supplying geothermal energy internationally.

ENERGY / GREEN ENERGY

# MAGNETIC ENERGY

---

Passion for Performance specializes in building top-quality magnetic technology that will improve the lives of people worldwide. As a supplier, we can provide a large number of magnetic products that can assist with the generation of this energy type.

If you are in need of high quality magnetic parts or generator solutions we are available to assist you. We can produce and supply a wide range of magnetic energy products.

ENERGY / GREEN ENERGY  
**SOLAR ENERGY**

---

The Solar industry today represents one of the greatest hopes for the future in sustainable energy. With the popularity of solar cells and even major solar farm's being produced across the United States, Passion for Performance is a proud supplier in this industry.

We can produce a wide range of parts for supply within the solar industry including solar panels, brackets, battery solutions and more. Whether you are seeking storage solutions for energy or assistance with energy generation solutions, we can provide the top supplies you may need.

ENERGY / GREEN ENERGY  
**WIND ENERGY**

---

Wind power is a sustainable energy type that is also taking off to new heights. Around 15% of the United States electricity usage could be powered by wind power in this coming year. With the demand for wind energy skyrocketing, Passion for Performance is working to improve its efforts in building top quality wind energy solutions.

If you are working in the wind energy field worldwide, we want to be your supplier of choice. Contact us today.
